Education

AISSMS Institute of Information Technology

2022 – 2026

Bachelor of Technology, Artificial Intelligence and Data Science — CGPA: 7.9/10

Experience

Flowwork Technologies

Feb 2025 – July 2025

AI Automation Engineer Intern

- Implemented agentic AI automation solutions using Make.com and n8n to solve real-world business problems.
- Created intelligent workflow automation systems that reduced manual processing time by 60%.
- Built multi-agent AI systems for document processing, data extraction, and task automation.

Infosys

Sep 2024 – Jan 2025

Data Science Intern

- Engineered end-to-end IPL analytics pipeline processing 50,000+ data points with Python (Pandas, NumPy), achieving 87% prediction accuracy through ensemble ML models (Random Forest, XGBoost) for player performance forecasting.
- Designed interactive BI dashboards in Power BI with Python integration, implementing slicers, drilldowns, and Plotly visualizations to deliver self-serve analytics and multi-season trend analysis.

TechSaksham

May 2024 – Aug 2024

AI Developer Intern

- Developed AI-powered educational chatbot using Python (NLTK, scikit-learn, Streamlit) with TF-IDF vectorization and cosine similarity for intent matching, serving 200+ domain-specific Q&A across programming, interview prep, and career guidance.
- Implemented intelligent retrieval system structuring 50+ technical topics with 95% response accuracy across student queries, delivering scalable NLP solution with clean requirements.txt and production-ready architecture.

Projects

DocuMind Pro - Intelligent Document Processing System — Python, ML, NLP, Streamlit, OCR

2025

- Engineered machine learning algorithms using Python (text classification, named entity recognition, sentiment analysis) to automate document workflows with 95% accuracy.
- Constructed Streamlit web application with OCR integration supporting document formats, delivering real-time data extraction and document management.

AI Trip Planner - Intelligent Travel Assistant — Python, Streamlit, LangChain, ML

2024

- Developed AI Trip Planner with Python (Streamlit, LangChain, Google Gemini) generating personalized travel plans including cost, transport modes, time/distance, and local recommendations across 100+ destinations.
- Built responsive UI orchestrating LangChain workflows to capture user inputs (dates, budget, destinations) and deliver structured natural-language travel plans via recommendation engine analyzing historical patterns in single interactive session.

Technical Skills

Coursework: OOP, DBMS, NLP, Operating Systems, Computer Networks, Machine Learning, Deep Learning

Programming Languages: Python, SQL

Database Technologies: MySQL, MongoDB

AI/ML Frameworks: TensorFlow, PyTorch, Keras, Scikit-learn, XGBoost

Deep Learning: CNNs, RNNs, LSTMs, Transformers, GANs, AutoEncoders, BERT

Agentic AI & Automation: AutoGen, CrewAI, Make.com, n8n

Data Analysis and Visualization: Pandas, NumPy, Matplotlib, Seaborn, NLTK, Power BI, Tableau

Tools & Platforms: Git, GitHub, Visual Studio Code (VS Code), Jupyter Notebook, Google Colab

Certifications/Courses

Oracle Cloud Infrastructure 2024 Certified Generative AI Professional – Oracle (Global Certification)

Comprehensive Data Science, Machine Learning, DL, NLP Bootcamp – Udemy

AI Business Intelligence Analyst - Skill India Digital Hub (SIDH)

IBM Data Analyst – Coursera

Positions of Responsibility

National Service Scheme – Technical Secretary (2023 – 2024) — Technical Skills, Event Coordination

Artificial Intelligence Student Association – Administrator (2024 – 2025) — Leadership, Team Management
